Su Altuntaş
UI/UX Designer

I was born in 1998 in Istanbul, Turkey and have always had a deep passion for art and design. Throughout my high school and university years, I actively pursued my interest in design by taking on freelance projects, constantly honing my skills and nurturing my creative instincts.

After successfully graduating from university and entering the professional field, I wholeheartedly immersed myself in the world of design. My lifelong goal is to craft beautiful products that inspire people to appreciate the elegance of intuitive design. My journey has been marked by dedication, commitment to learning and a firm belief in the power of design to transform the way we interact with the world.

Experience

September 2020 – present

Lyrebird Studio UI/UX Designer
Istanbul, TR

Currently designer on the app FaceLab (App Store, Google Play)
